

# The Mission of Muskogee County EMS, our Core Values and Employee Responsibilities.

Our Mission Statement is:

***To be the leader in pre-hospital care through service and education.***

What does it mean?

As a **leader**, MCEMS strives to provide not only the best, most up-to-date pre-hospital care possible, but also to present ourselves as an example to other EMS agencies in all areas of service. Simply stated, we want to be the best and show others how to be the best as well.

MCEMS is, first and foremost, a **service** agency designed to do for others what they cannot do for themselves. It is this belief in the intrinsic value of serving others that inspires us to continue working for the good of others and to seek continual improvement for our service.

We continually improve what we do by **educating** ourselves in the latest techniques and technologies for doing our job. We focus on identifying and providing needed educational opportunities, not only for ourselves but also for the communities we serve, enhancing our own practice and demonstrating our commitment to community service.

At MCEMS we have identified six core values that help our service to have the greatest **IMPACT** and your responsibilities to each one as an employee of MCEMS.

**I**ntegrity

**M**otivated with Compassion

**P**rofessionalism

**A**daptability

**C**ontinual Improvement

**T**eamwork
